Verbal Description:

Note: Drawings are upside down.

This piece is of a tan, hard paste with some micaceous and white inclusions. It is part of a modeled censer rim which has a row of applied dots ( $\pm 1$ cm diam) painted blue along the edge. Under the rim is an applied projection with 3 vertical incisions which is painted red and has been broken off. To the right of the projection is a plain applied vertical strip, also red (.7cm wide). There is also evidence of red paint under the rim and in the area to the right of the clay strip.

The inside of the censer body is very even and has brush strokes. The piece is very slightly curved. It is possible that it is part of a square vessel which wasn't perfectly squared.
